

DIRECTIONS TO THE MEDICAL GENETICS DEPARTMENT
Located within the Medical Library and Research Building

The closest and best parking garage is: **University Hospital Outpatient Garage/Visitor Parking**
(one sign marks it as "Indiana University Hospital Parking")

Walking Directions:

Outside (quickest way, see diagram on other side)

Walk to the exit of the parking garage (near the pay booths). Walk west along Walnut Street, you will be paralleling the monorail/elevated rail. The Medical Research and Library building is the first building on the left. The monorail system also has an elevated walkway which enters the Medical Research and Library building. The main entrance doors are beneath the monorail walkway. Enter through the double doors and turn right, you will see the Medical and Molecular Genetics Department, room 130. Enter here and ask for Cindy Hunter.

Inside (best if bad weather, allow 5 to 10 minutes to walk to the department)

After parking, enter University Hospital through the main doors. Walk straight ahead (you will walk past the information desk). On the left, there is a hallway named "First Street". Walk along this hallway (you will walk past the Prescription Center). You will next need to turn right at a certain hallway. Look for "Emergency Way"; this is a red rectangle sign and is located at the top of the wall/ceiling. Turn right and walk down this hallway.

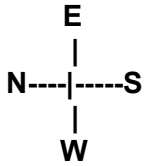

At the end of this hallway, there are stairs and 2 elevators. Using one of these go up to the second floor. After exiting the stairs/elevators, turn right and walk through a pedestrian bridge ("gerbil tube"), a sign for the Clarian People Mover is also posted at the entrance of this bridge. This will exit on the second floor of the Medical Research and Library building. You may walk down the stairs, or if an elevator is preferred, turn left and walk through the single door to the elevators (do not follow the signs for the people mover)

If you walked down the stairs, the medical library is now on your right. Keep walking straight towards the double set of doors and on your left you will see the Medical and Molecular Genetics Department, room 130. Enter here and ask for Cindy Hunter.

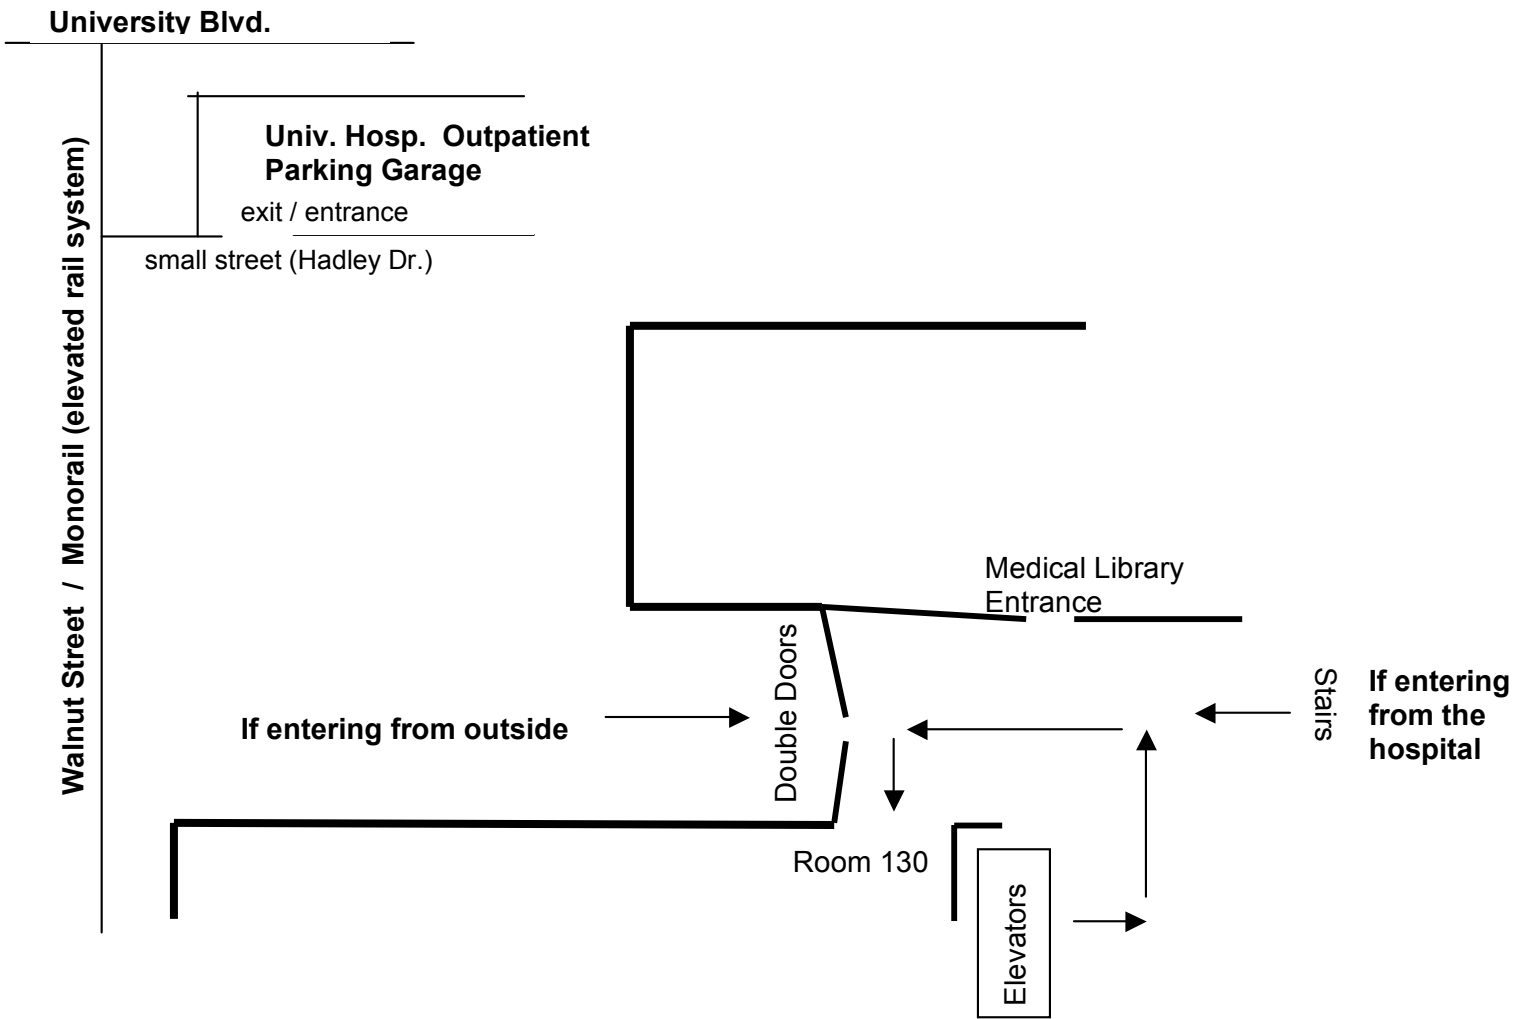

If you used the elevators, the medical library is on your left as you exit the elevators. Turn left and walk towards the library for a few feet. Turn left again and walk towards the double set of doors and on your left you will see the Medical and Molecular Genetics Department, room 130. Enter here and ask for Cindy Hunter.
